

For a Better World

Walk The Talk II

An Assessment of Limak's Performance
From Sustainability Rhetoric to Action
2015-2021

Kuwait International Airport

INTRODUCTION

Foreword

Esteemed Stakeholders,

Shortly before we leave the year 2021 behind, the uncertainty introduced by the pandemic conditions have been replaced by the trend of recovery, even if slowly. From now on, an intense agenda awaits us where post-pandemic process and recovery scenarios are to be addressed accordingly.

Sustainability, once more, is among the top priorities of this challenging agenda. While the climate crisis continues to be the most substantial area of challenge and struggle for the entire world to find a solution, changing stakeholder expectations encourage governments and the business world to review, update and renew their current sustainability strategies. As a matter of fact, at certain points, it has been argued that even sustainability is not enough, and that sustainability may be exposed to change and transformation, especially in the post-pandemic world. This reveals us the fact that we shall have to switch from existing sustainability models to new models in the near future.

To that end, if we take a quick look at the year 2020, despite the pandemic conditions, last year has experienced significant expansions in terms of sustainability. Both the United Nations' declaration of the next ten years as the **"Decade of Action"** and the concept of **"Stakeholder Capitalism"** in the Davos Manifesto have changed the perspective of corporations and the public with reselect to the sustainability. Apart from these developments, the European Green Deal, going beyond the aim of rendering the European Union carbon neutral and shall significantly change our business models and sustainability practices, reminded us once again that we are required to adopt sustainability as a goal, not merely a tool.

In this context, as Limak Group of Companies, we are very pleased to present the second one of our "walk the talk" report series, which we have published the first one last year with the title **"Walk The Talk For a Better World"**, our esteemed stakeholders, by updating it to include the projects we have implemented between **2015-2021**. This report also includes a comprehensive evaluation of the Limak Group of Companies, operating in different sectors, with an approach focusing on sustainability through the perspective of the United Nations Sustainable Development Goals. As in our previous report, our projects have been analyzed and reviewed within the framework of the United Nations Global Compact and Limak Sustainability Business Approach Focuses. Nevertheless, for the first time, the World Economic Forum Stakeholder Capitalism Indicators have been included in the analysis within the scope of this report.

To that end, I think it would be highly beneficial to emphasize a truly significant aspect. The concept **"Stakeholder Capitalism"** positions corporations as organizations serving not only their shareholders, but their entire stakeholders. In another words, not only shareholders but also the entire stakeholders are involved in the value creation process. We, as Limak, strive for carrying the values we have defended since the beginning of our sustainability journey even further by reporting in accordance with stakeholder capitalism metrics. I would like to proudly share that Limak, among nearly 100 global corporations committed to taking these metrics into account in their reporting process, is one of the three Turkish corporations committed and dedicated to this issue.

Therefore, we have classified and disclosed to you, our esteemed stakeholders, the sustainability performance and projects of our Group companies in our second **"Walk The Talk"** report. You will be able to see in detail how we integrate the relevant metrics into our strategy and activities in our next sustainability reports.

We have already presented you, our esteemed stakeholders, 516 projects and practices in our first inventory endeavor we have published in the year 2020. We are delighted to see that we have reached 822 projects and practices in this second inventory. Despite the challenging conditions of the pandemic, the continuation of our Group Companies' endeavors with a sustainability perspective is a great source of motivation for us. As the Limak Group of Companies, acting as the pioneer in the entire sectors in which it operates and aims to raise the bar, we continue to set extensive goals for sustainability and work for the realization of such. Our objective is to incorporate and embed sustainability within the DNA of Limak Group of Companies. In this context, we continue our efforts and endeavors to make sustainability one of the indispensables of our corporation, together with our employees, through wisdom and cooperation.

I would like to have this occasion to extend my gratitude and thanks to yourselves, our esteemed stakeholders and our colleagues for whole heartedly supporting and working devotedly for our sustainability endeavors, as well as, our esteemed executives, employees and our sustainability governance platform and from whom we have benefited from in terms of their guidance in our sustainability journey. In terms of their guidance in our sustainability journey

EBRU ÖZDEMİR
CHAIRPERSON OF THE BOARD OF DIRECTORS

About The Report

Limak Group of Companies (Limak), starting from its business partners and its stakeholders, has undertaken to disseminate the sustainability mentality in line with the global goals. To this end, Limak presents its social, environmental and governance performance to its stakeholders and business partners in a transparent manner through the sustainability reports it regularly publishes.

In this context, Limak Group of Companies presented the sustainability projects inventory covering the period 2015-2019 to its stakeholders in 2020 with the report titled "Walk the Talk" and the **"Walk the Talk II"** report you are reading is a comprehensive and detailed version of the previous report to include the projects of the said inventory for the period of 2020 and 2021.

This report presents the activities of the corporations in the infrastructure, cement, energy (generation, distribution and sales), food and beverage, tourism and construction fields constituting Limak Group of Companies between 01.01.2015 and 31.08.2021 and the outputs of these activities are associated with the following:

About Limak Group of Companies

Established its roots in 1976 with Limak Construction, Limak Group of Companies continues its activities in the operating areas of construction, tourism, cement, infrastructure and energy investments, energy contracting, aviation, food and technology with its approximately 50 thousand employees.

With more than 100 projects completed successfully having the total value of 10 billion USD exceeding ranging from airports to ports, from dams to irrigation facilities, from highways to hydroelectric power plants, from industrial facilities to oil and natural gas pipelines, from holiday villages to building complexes, Limak Construction is among the largest international construction corporations in the world.

Having one of the largest hotel chains in Turkey with its 9 hotels in operation and a bed capacity of over 6,000, Limak Tourism has been expanding day by day, increasing its contribution to the Turkish economy.

Limak Cement is the second largest cement producer in Turkey in terms of capacity in the sector, with 12 cement factories, 23 ready-mixed concrete facilities, 1 pumice block facility and an annual cement production capacity of 9.6 million tons of clinker and 17.7 million tons of cement. Having two substantial investments in Africa, Limak Cement further operates cement factories in Mozambique and Ivory Coast.

The representative of the group in the food sector, Limkon continues its accomplishments in the sector by producing fruit juice concentrate, fruit puree, tomato paste and all sorts of fruit-based products at its facility in Adana.

Limak Energy operates in the fields of energy generation, distribution, sales and trade. A steady growth has been secured in the energy portfolio with a current capacity of 3,500 MW with its hydroelectricity, solar, geothermal, natural gas and coal power plant. Moreover, it has been sustaining its quality-oriented activities in the energy contracting sector since 2013.

Limak successfully continues its operations within the infrastructure investment area.

The corporation seeks new project opportunities in this field and successfully continues its endeavors and works to increase operational and financial efficiency in existing projects.

Making a difference with its social investments as well as its economic activities, Limak has established the Limak Education Culture and Health Foundation in 2016 for the purpose of uniting its entire social investments and aid projects performed for years under a single roof and ensuring their continuity in a more corporate and effective manner. continues its social investments without losing its pace.

LİMAK and SUSTAINABILITY

Our Sustainability Approach

SUSTAINABLE
DEVELOPMENT GOALS

We, as Limak Group of Companies, are well aware of the fact that we have been going through an era in where we are required to work together with the entire world to ensure the continuity of our sturdy humane existence in a sustainable planet in unison with the entire elements of nature.

In this direction, we assess the business conduct in three dimensions in our entire operations, take our decisions in this way and manage our value creation process by paying utmost attention to these dimensions.

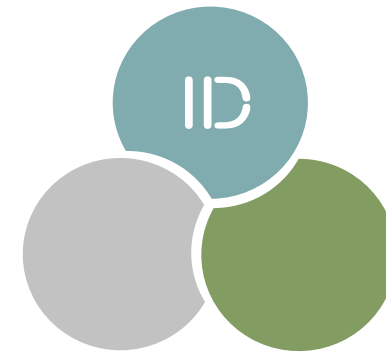

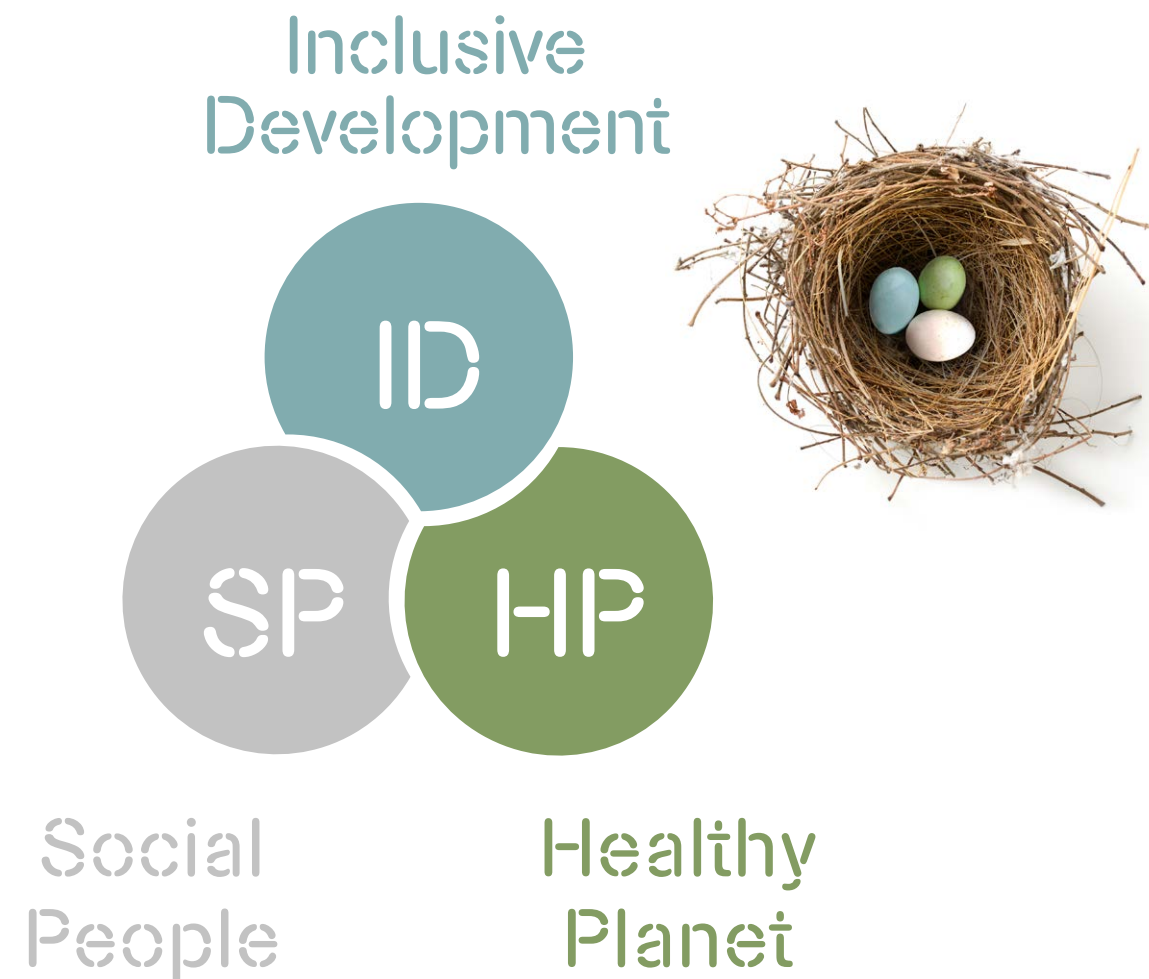

Limak Group of Companies Sustainability Policy

has been drawn up in line with founding values, basic working principles, business ethics mentality and approach and global goals of Limak to serve as the business constitution of the Group.

The Sustainability Policy is addressed as a guide that Limak Group of Companies shall refer to while performing its entire activities and operations and making decisions, and to include global stakeholders in the entire value chain, with whom the Group interacts directly or indirectly.

Business Approach Focal Points

Limak Group of Companies Sustainability Policy has been built on three focus areas directly related to each other.

Inclusive Development Oriented Business Approach

Limak Group of Companies, together with all its employees, business partners and stakeholders in every sector in which it operates, adopts a sustainable business approach that is compatible with its global goals and believes that economic development should be achieved with all humanity, including all elements of the planet.

Limak Group of Companies:

- Performing its entire activities in line with the United Nations Sustainable Development Goals (UN SDGs).
- Complying with the 10 Principles of the United Nations Global Compact, of which it is a signatory. Allocating resources to research and development activities in every sector in which it operates.
- Enabling the use and development of innovative technologies that shall contribute to sustainable development. Taking into account the wishes and expectations of the stakeholders, it is important to support stakeholder participation in decision-making processes.
- Seeking to transform the sustainability perspective into a company culture and to raise awareness in this area both in employees and stakeholders.
- Embracing the duty to convey its sustainability work and experience to all its stakeholders and to the world through its partnerships and active initiatives on international platforms.
- Enabling all sorts of work to be performed to ensure sustainability in the supply chain.
- By measuring and evaluating the economic, environmental and social impacts of all activities; it takes improvement actions to reduce the negativities.
- Regularly publishing its sustainability report in line with international standards.
- Embracing a business mentality that is transparent, compliant with basic business ethics rules and combats corruption.

Social People

Oriented Business Approach

Limak Group of Companies continues all its activities and business processes based on the protection of human health, support of human development and equal opportunity. It focuses on the establishment of innovative, reliable and accessible work and living environments to enable sustainable human development. The Group believes that sustainability can be achieved through the development of social structures, the institutional commitment and continuity of its employees, that the individual should perceive the social structure with all its elements and consider its existence together with the health of the social structure.

Limak Group of Companies:

- Both sectoral and social initiatives in all areas and regions of operation, especially on promotion of quality education ensuring equality of opportunity and protection of human health shows the utmost attention to the issues of the observance.
- It considers developing and implementing practices that shall provide improvement in the field of occupational health and safety as a part of its business.
- It creates opportunities for the social and economic development of the community and local stakeholders in their fields of activity, to develop social projects that shall contribute to local employment, and to build cooperation.
- By aiming to increase the loyalty and well-being of employees, it creates conditions that shall make the working environment more efficient.
- By preventing all forms of discrimination, it provides its employees with equal rights in matters such as employment, career management, remuneration and performance assessment.
- It seeks to increase women's employment at all levels by supporting the development and qualified active participation of women's employment.
- Actively works to improve the personal development of its employees and the awareness of global citizenship and supports these studies.

Healthy Planet

Oriented Business Approach

While carrying out its activities, Limak Group of Companies is based on protecting all elements of the planet and reducing environmental impacts, together with all its business partners and stakeholders. It considers it a fundamental value to carry out all its activities with respect to the environment and develops ways to eliminate all possible negative elements of its and environmental relationship by detecting it in advance and believes that R&D and P&D investments should be valued for this purpose.

Limak Group of Companies:

- It measures and reports environmental impact across all areas of activity and takes improvement actions by setting sector-based targets.
- It enables the development and implementation of environmentally friendly products and services.
- The Group continuously monitors, develops, and works to build the required infrastructure or to renew the existing one in all sectors,.
- It strives to increase the use of renewable energy sources (FEC) in energy consumption.
- It develops projects to ensure the efficient use of water and to provide awareness in all stakeholders, starting with employees.
- It calculates, verifies and tracks emissions from its activities to combat climate change.

Our Sustainability Management

In Limak Group of Companies, monitoring all sustainability activities and performance, determining the performance indicators required to monitor this performance, performance and practices within the scope of sustainability priorities are embraced at the level of the Board of Directors. The sustainability management, which we call "Limak Sustainability Leadership", consists of the "Sustainability Governance Platform" with representatives from all our companies under the leadership of Chairperson Ebru Özdemir, and the related target committees and support office.

Our Sustainability Goals

01

SP ID HP

Carrying out activities with the aim to develop a sustainability conception in all sectors and supporting the existing activities.

All of our companies shall support efforts to improve sustainability with at least one project each year.

4 QUALITY EDUCATION 8 DECENT WORK AND ECONOMIC GROWTH 12 RESPONSIBLE CONSUMPTION AND PRODUCTION 17 PARTNERSHIPS FOR THE GOALS

02

SP ID

Supporting the development of women employment and qualified active participation of women employees. Increasing women employment rate on entire levels.

It is aimed to increase our women employment rate by **20%** by 2023 and by **40%** by 2026.

5 GENDER EQUALITY 8 DECENT WORK AND ECONOMIC GROWTH

03

SP ID

Transfer of ethical principles and rules to the entire value chain in all our companies, including suppliers.

It shall be transferred to our entire value chain until 2023.

8 DECENT WORK AND ECONOMIC GROWTH 16 PEACE, JUSTICE AND STRONG INSTITUTIONS 17 PARTNERSHIPS FOR THE GOALS

12

HP

Reducing the emission releases resulting from our operations.

By conducting emission reduction works in all our companies, an average of **27%** emission reduction shall be achieved by 2026.

9 INDUSTRY, INNOVATION AND INFRASTRUCTURE 12 RESPONSIBLE CONSUMPTION AND PRODUCTION 13 CLIMATE ACTION

ALIGNMENT WITH SUSTAINABILITY FRAMEWORKS

Limak Limra Hotel

Strategic Analysis from a Sustainability Perspective

The sustainability analysis of our projects and applications was submitted to the evaluation of all our stakeholders in 2020 with the “Walk The Talk” report.

While we bring our 516 projects and implementations of 2015-19 to the attention of our stakeholders our first inventory study, it is a pleasing development to see that our performance in this area continues in our second inventory study and that our projects and applications have reached **822** projects and applications with an increase of approximately 60%.

Inventory work has been prepared for 2015-21 by reanalyzing the alignment of our sustainability projects and practices with global sustainability frameworks and the contribution of all of us to achieve our common goal in four main headings. Detailed analyzes of compliance with the following four frameworks are included in the Limak Discourse to Action sustainability inventory report.

- UN Sustainable Development Goals 2015-306 (UN.SDG)
- UN Global Compact (UN.UNG)
- WEF Stakeholder Capitalism Indicators
- Limak Sustainability business Concept Focus

Click for more information about Limak Sustainability Focal Points:
Limak Group of Companies Sustainability Report 2018-2019

Alignment with UN.SDG

UN.SDG (United Nations Sustainable Development Goals) 2015-30 creates an integrated framework covering the fields of economy, environment, social system and management with the aim of developing a common purpose on a global scale.

The UN.SDG framework allows organizations to review their sustainability performance and compare the compatibility of their own targets with global targets.

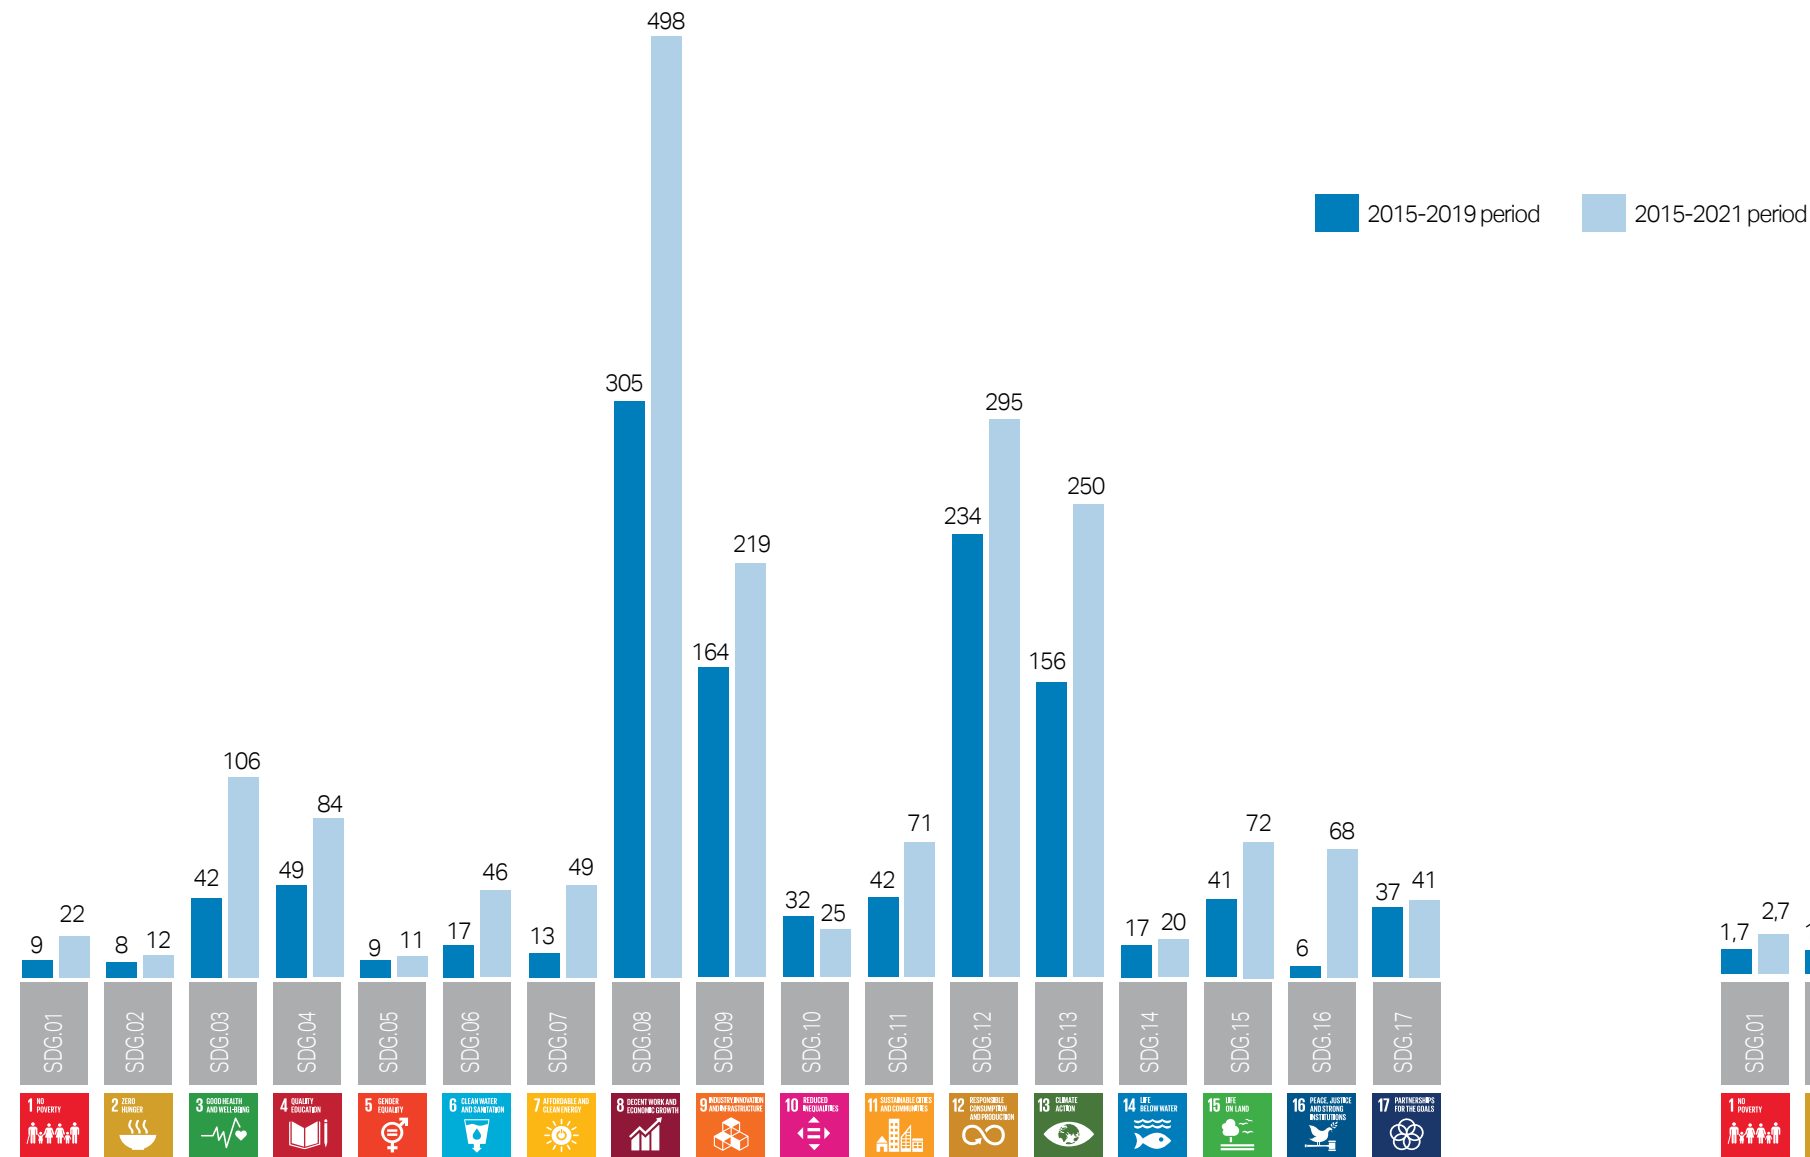

In 2015-20, there was a 60% increase in sustainability projects and applications of Limak Group of Companies. It is observed that new projects are gaining intensity in areas that transform business life and working understanding.

Intensification is seen in SDG.08, which aims at a decent work environment and development, SDG.09, which aims to realize this development with an innovative understanding, SDG.13, which focuses on climate compatibility, and SDG.12, which aims to promote the responsible behavior of all stakeholders.

On the other hand, the requirements of the pandemic environment, health issues (SDG.03) it has also led to an increase in projects and applications. There has been an increase in the number of projects and applications related to the protection of clean water, access to water and hygiene in connection with this area. A large number of awareness-raising and information projects have been implemented in the field of health, especially showing the sensitivity to protecting public health and occupational health and safety.

During this period, peace, justice and strong institutions needed on a global scale (SDG.16) projects and applications that will support the facility have also been implemented. Especially serious studies have been carried out in this area in order to produce systematic solutions and bring them to life.

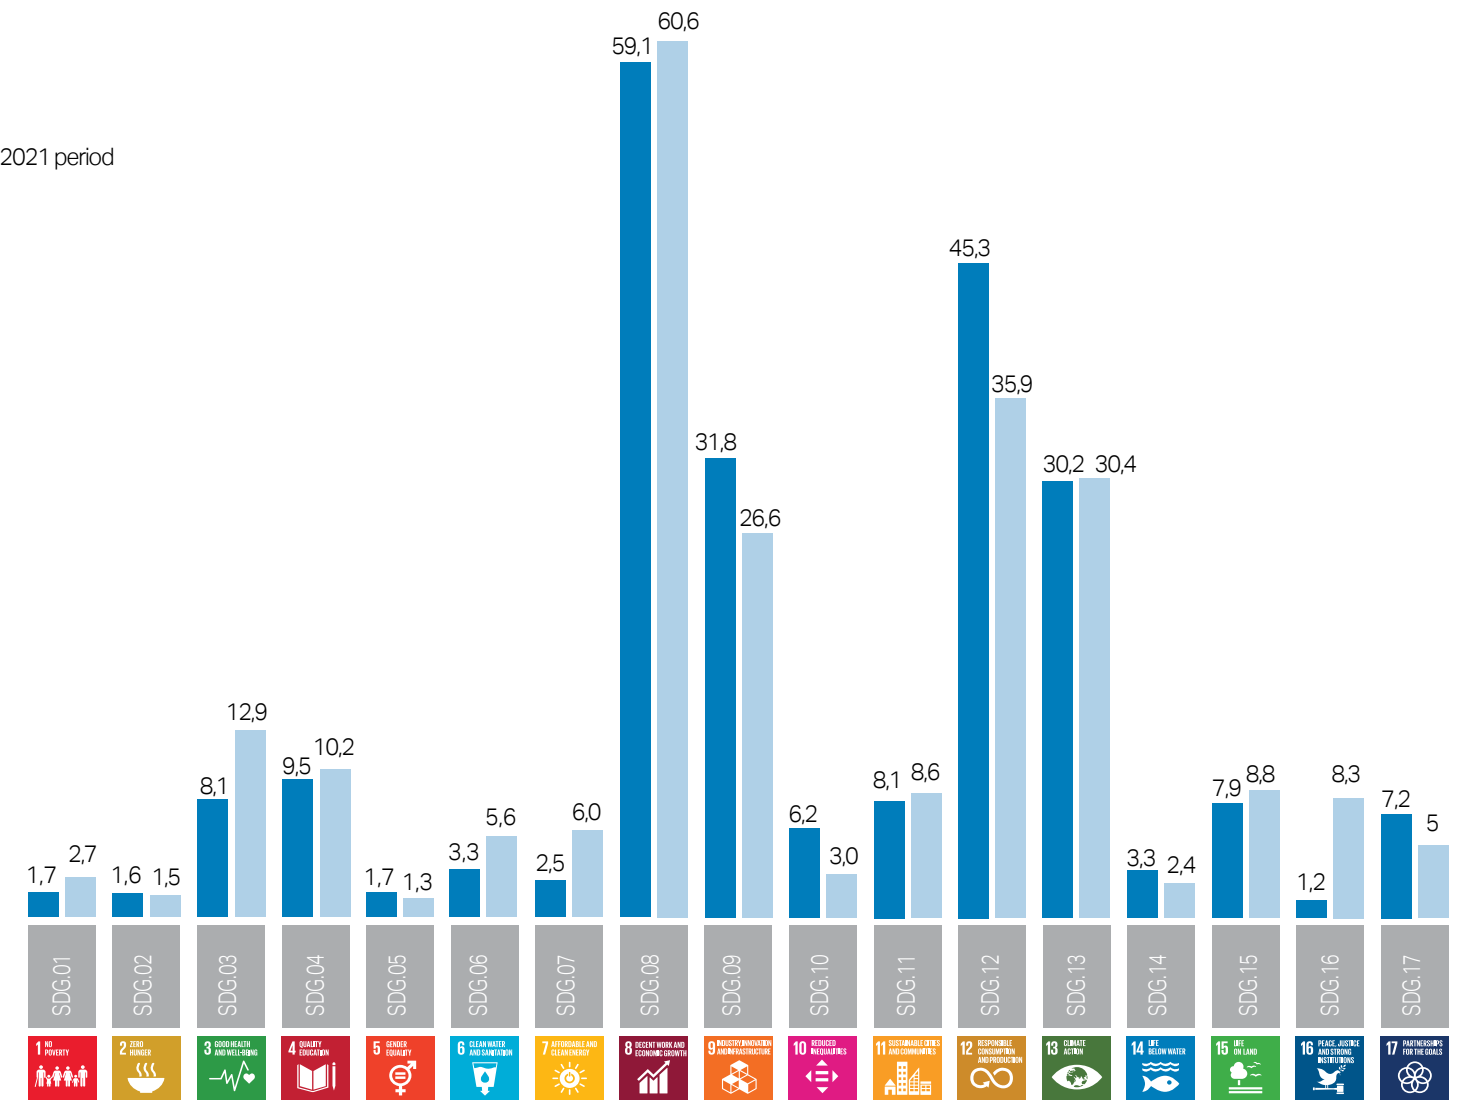

Comparative Analysis of Limak Group of Companies Projects UN.SDG 2015-19 and 2015-21 (n)

In addition to the numerical orientation of the Limak Group of Companies to the SDGs mentioned above, it is noteworthy that the balance of the general sustainability approach has been preserved.

The proportional protection of projects and practices focused on **Decent Work and Economic Growth**, **Responsible Production and Consumption** and **Climate Action** is also striking.

Comparative Analysis of Limak Group of Companies Projects UN.SDG 2015-19 and 2015-21 (%)

It was observed that similar projects were carried out in other priority areas of health, education and equality and the sustainability composition was preserved.

Alignment with UN.UNG

UNG (United Nations Global Compact), which has determined the core values of the business world's understanding of doing business since 2000, is a the main framework consisting of ten principles that Limak Group of Companies also accepts as a reference in its sustainability projects and practices.

It is observed that Limak Group of Companies has implemented a remarkable number of projects and practices under the environmental heading, which recommends the precautionary approach of the business world to environmental problems, to engage in activities that will increase environmental responsibility, and to develop environmentally friendly technologies.

Ensuring that the business world has a working understanding that respects human rights is also among the objectives of UN.UNG. This title suggests that organizations disseminate the principle not only within themselves, but also across their entire ecosystem. Limak considers the work of all its stakeholders in compliance with fundamental human rights as an issue at the center of its sustainability performance.

Global Compact: 10 Principles

- HUMAN RIGHTS
- 1

Businesses should support and respect proclaimed human rights.
- 2

Businesses should not be complicit in human rights violations.
- LABOUR
- 3

Businesses should support workers' freedom of association and collective bargaining.
- 4

Forced and compulsory labor should be stopped.
- 5

All forms of child labor should be stopped.
- 6

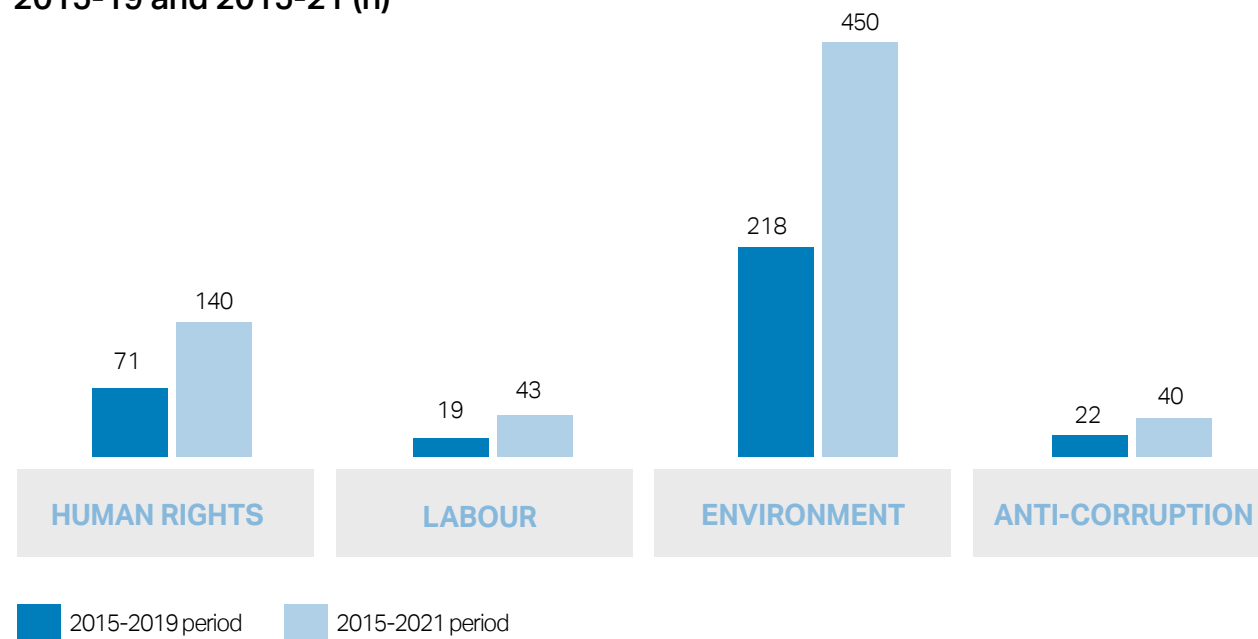

Discrimination in recruitment and placement should end.
- ENVIRONMENT
- 7

Businesses should support precautionary approaches to environmental problems.
- 8

The business world should support all kinds of activities and formations that will increase environmental responsibility.
- 9

The business world should support the development and dissemination of environmentally friendly technologies.
- ANTI-CORRUPTION
- 10

Business must fight all forms of corruption, including bribery and extortion.

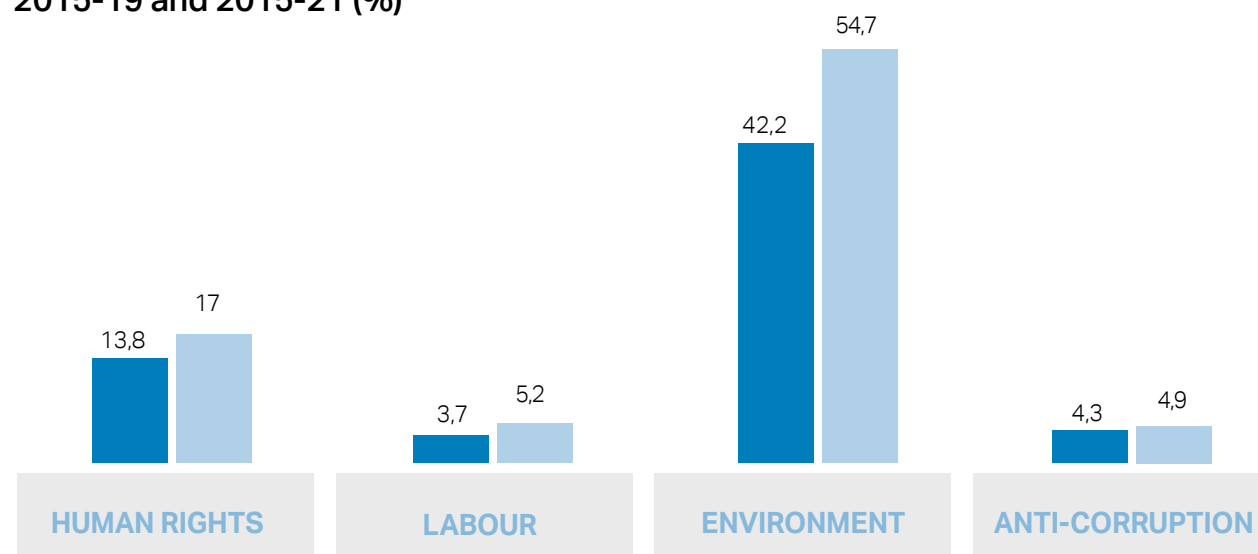

**Comparative Analysis of Limak Group of Companies Projects UN.UNG
2015-19 and 2015-21 (n)**

In the UN.UNG principles of the Limak Group of Companies, it is seen that these principles exhibit a sustainability composition depending on the target intensity. In the comparative analysis of the two periods, it is seen that our Group increases the number of projects and applications but maintains the overall proportional distribution.

In addition, during the period under review, an increase was observed in projects and practices aimed at raising labor standards and combating corruption in every region of operation.

**Comparative Analysis of Limak Group of Companies Projects UN.UNG
2015-19 and 2015-21 (%)**

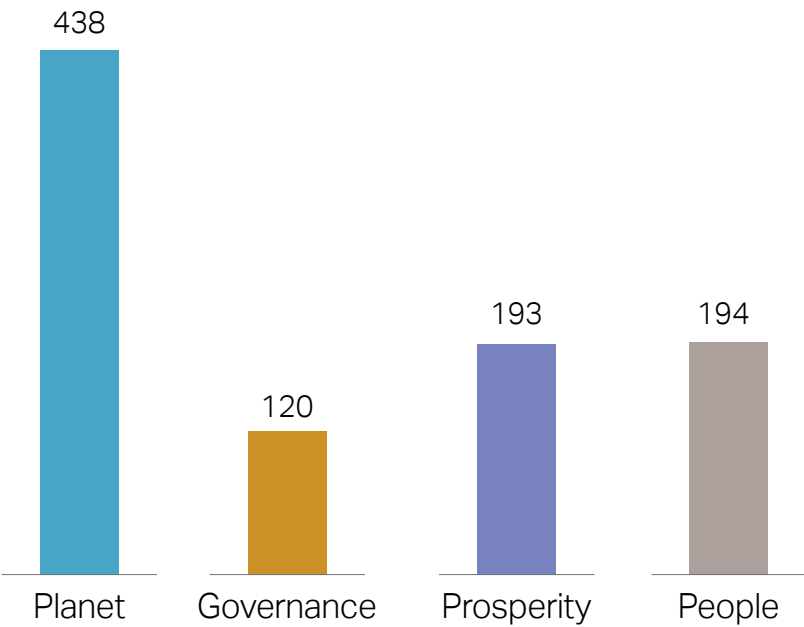

Alignment with the WEF Framework

In September 2020, the WEF (World Economic Forum) announced the metrics and indicators that business should consider in reporting its performance in the sustainable value creation process to its stakeholders.

The document, published under the title “Measurement of Stakeholder Capitalism”, recommends reviewing and reporting sustainability performance in four main areas.

- Governance
- Planet
- People
- Prosperity (Society)

Alignment of Limak Group of Companies Projects with WEF-MSA (n)

In this inventory report of Limak Group of Companies, the distribution of our sustainability projects and practices according to the headings Specified in the WEF document has also been analyzed.

A significant part of the sustainability projects and applications carried out by Limak includes activities aimed at protecting the planet. The fact that **53.3% of the 822 sustainability projects and applications implemented** in this context are related to the planet is an indication of the value given to this area.

It is noteworthy that the Group companies have carried out important studies, especially in the indicators that recommend improving working conditions, establishing an equitable and inclusive work environment, and placing occupational health and safety at the center of the production approach, and metrics that aim to measure performance in this direction. It is observed that **23.6% of all projects are aimed at creating an equitable, inclusive and reliable work environment**.

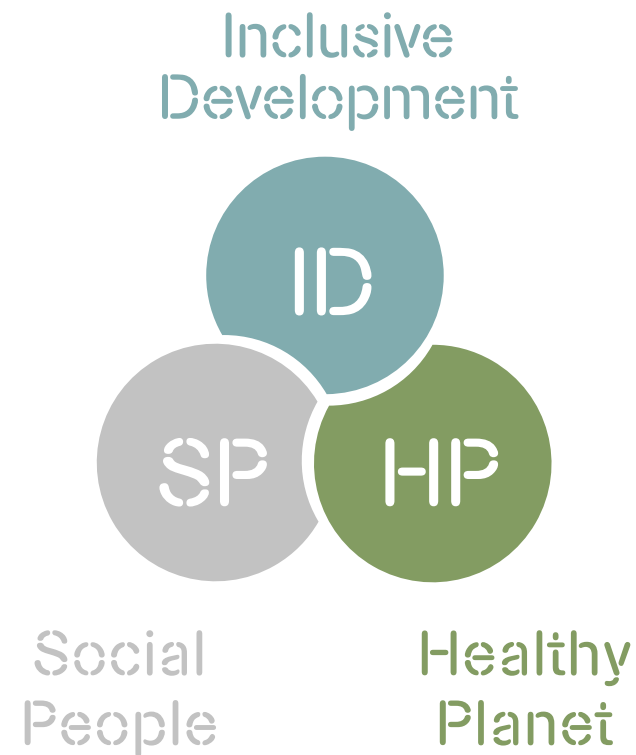

Our practices for realizing the added value produced by Limak in a way that **contributes to increasing social welfare corresponds to 23,5% of all our projects**.

Achieving a successful sustainability performance in these four areas is possible with a clear-cut, Sincere and ethical management approach.

The practices that will enable the Limak Group of Companies to have a management that has this understanding and can perform risk and opportunity analyzes correctly constitute **14,6%** of all projects.

Alignment of Limak Sustainability Focuses

In the sustainability report we have published as Limak Group of Companies, we have explained our business focus as "inclusive development", "social people" and "healthy planet".

The strategic objectives in the sub-headings of the focus topics overlap with UN.SD goals and UN.UNGCC principles, as well as with stakeholder capitalism indicators and metrics announced by the WEF.

In our updated inventory 822 projects and practices have been compared with our original model and the evaluation of our sustainability performance has been presented to our stakeholders for their duly review.

It has been determined that 53% of our projects and practices are compatible with our healthy planet, 37% with inclusive development and 33.5% with our social human focus.

Just like in every analysis title, it is considered and observed that protecting the planet and supporting climate action are the primary issues in this evaluation.

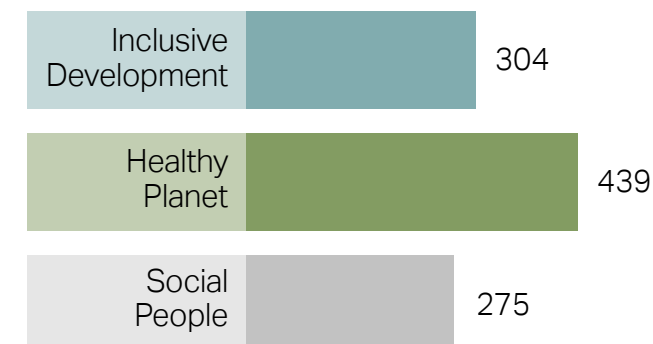

Particularly, the establishment of a more habitable planet depends on the efforts and endeavors of the entire individuals with a common purpose and solidarity. Achieving this shall only be possible with the establishment of an egalitarian and inclusive ecosystem.

Therefore, as Limak Group of Companies, the second focus area of our sustainability projects and practices is "inclusive development". We are highly pleased and grateful to experience that we, together with all our stakeholders, are striving to achieve a global goal with an ethical business approach and a good process management.

Our internal stakeholders and partners, adopted our main purpose and principles, have a great contribution to the healthy structure of the planet and our ecosystem. It is among our primary goals for these stakeholders to be involved in an equitable, inclusive and reliable environment and to develop their skills.

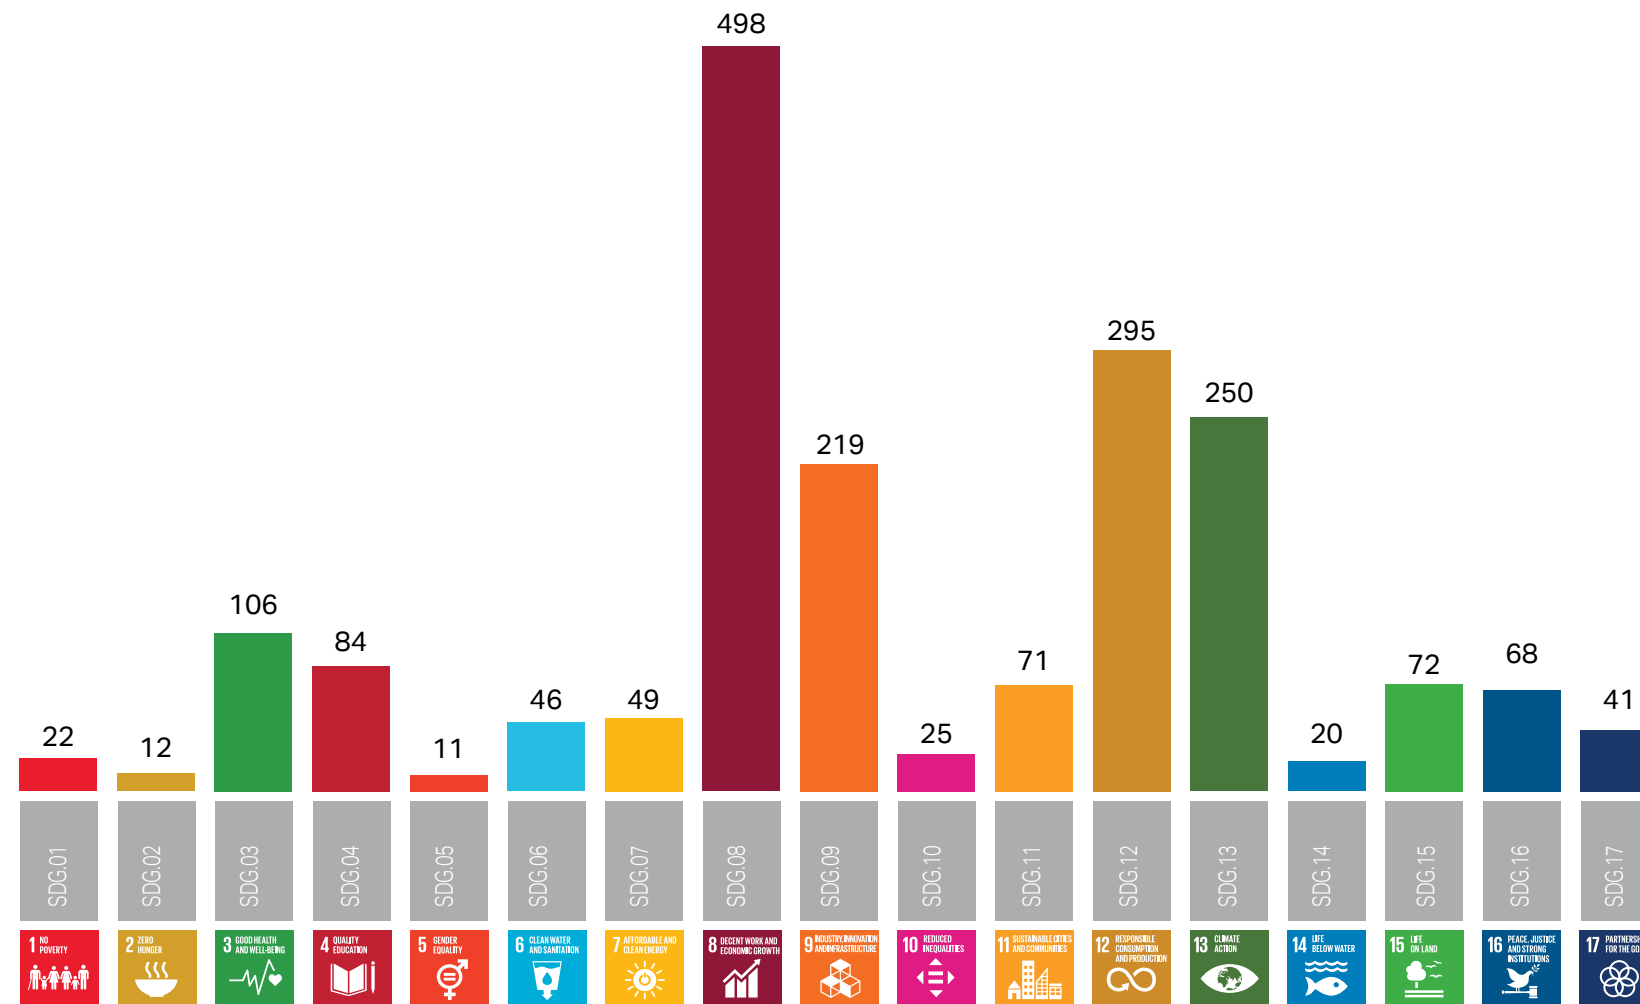

In this inventory study, it has been observed that our priority issues in all three areas are included in a balanced way, and our sustainability projects and practices support our performance in these areas.

Alignment of Limak Group of Companies Projects with Limak Sustainability Focuses

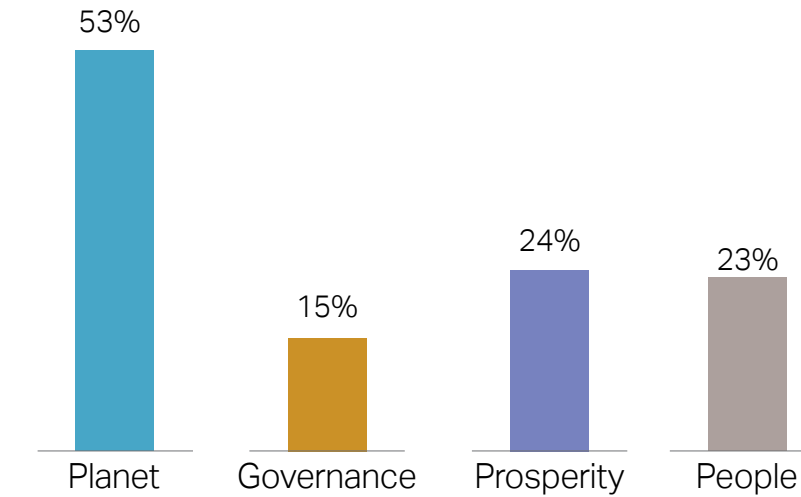

Alignment of All Projects of Limak Group of Companies with Sustainable Development Goals

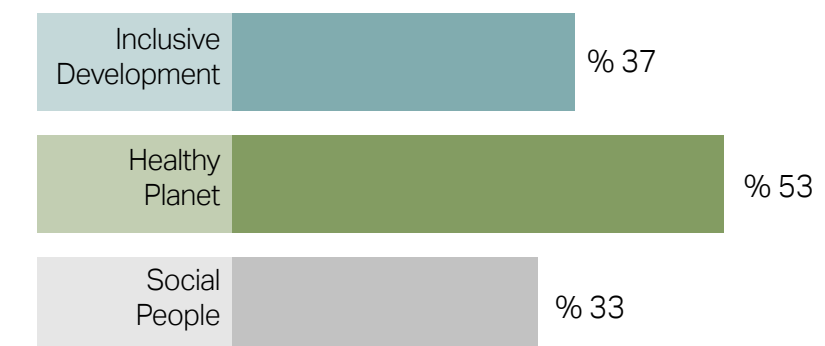

61% of all projects carried out in the Limak Group of Companies are projects that closely concern the business world and therefore all sectors in which it operates, and support stable, inclusive and sustainable economic growth, full and productive employment and decent work for everyone. A responsible production and consumption approach and innovation have been adopted to ensure sustainable economic growth. A responsible production and consumption approach and innovation have been adopted to ensure sustainable economic growth.

Alignment of Limak Group of Companies Projects with WEF-MSC

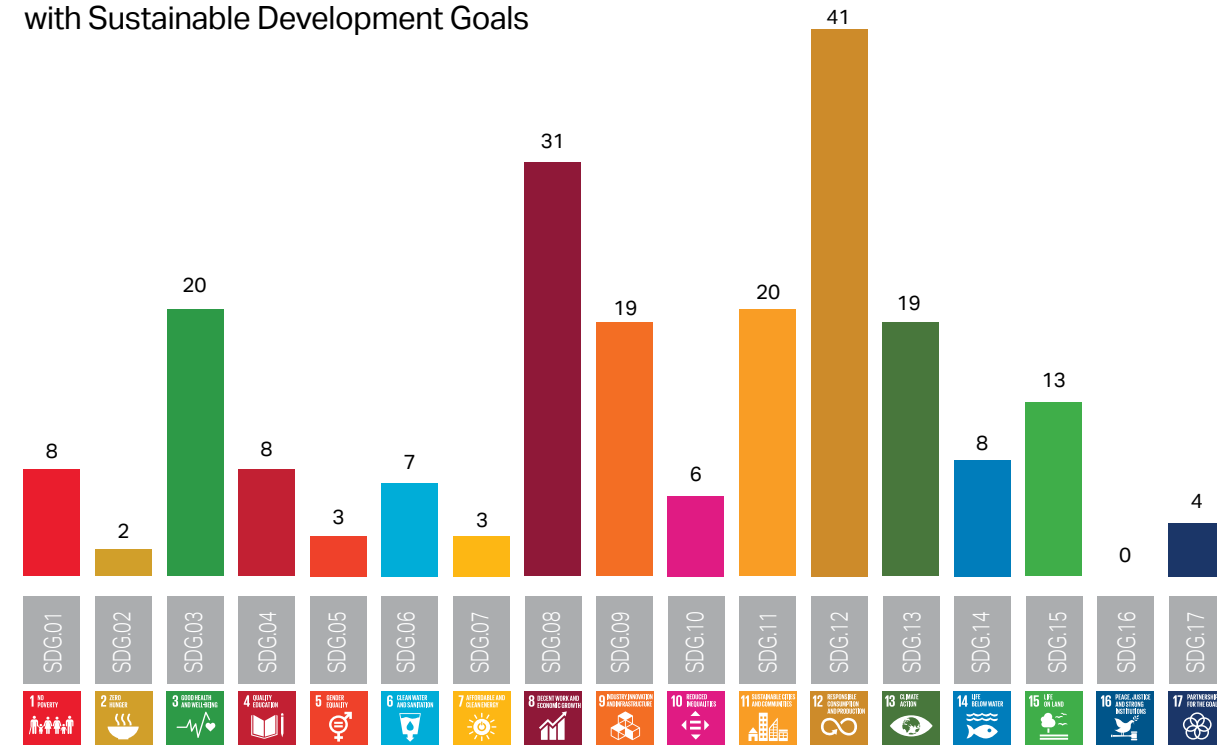

53% of the projects carried out by the Limak Group of Companies in the last 6 years are focused on "Protecting Our Planet". Project targets related to working life and work life are 24% of all projects. The projects that enable the activities to increase prosperity in the fields and geographies and to gain new values with social benefits and innovative approaches are 23%. Practices aimed at transforming the management approach have become widespread in the Limak Group of Companies, especially in recent years.
